Find new opportunities and potential partners in environment sector

**GREEN DAYS** 26-30 NOV. 2012

**INTERNATIONAL TECHNOLOGY & BUSINESS MEETINGS**

POLLUTEC FAIR Lyon – Village des Entreprises Rhône-Alpes

## GREEN DAYS

### Companies and laboratories visits

The Chamber of Commerce and Industry of Rhône-Alpes region (CCIR), Enterprise Europe Network member, welcomes foreign companies' delegations and invites them to discover environmental technologies in Rhône-Alpes.

The visits of Rhône-Alpes's companies and laboratories are organised in collaboration with the local partners: the Chamber of Commerce and Industry (CCI) International network, the CCI Environment network, the CCI of Savoie and the CCI of Ain.

Participants are invited to choose one of the following visits:

- **Visit 1: Industrial Ecology / Waste treatments**
- **Visit 2: Solar and building energy efficiency.**

These visits are free of charge for companies and research centres willing to participate. Registration is mandatory by the 5<sup>th</sup> of November 2012, through the website [www.greendays-pollutec2012.b2b-match.com](http://www.greendays-pollutec2012.b2b-match.com).

## General Programme

**26<sup>th</sup> of November 2012**

**13h15** Welcome coffee at the CCIR

**13h30** Bus departure from the CCIR

CHAMBRE  
DE COMMERCE  
ET D'INDUSTRIE  
DE LA SAVOIE

## Visit 1: Industrial Ecology / Waste Treatments

### 14h30 Introduction to different environmental measures applied by the *Plaine de L'Ain Industrial Park*

Focus on the waste treatments management put in by the Industrial Park companies (first industrial park which obtained ISO 14001, EMAS...).

### 15h15 Tours in the Industrial Park

Plaine de l'Ain Industrial Park welcomes about 125 companies of different sizes and activity areas.

### 15h30 Visits of companies specialized in waste treatments

- ☑ **TREDI COMPANY: Specialized in the thermic treatment by cremation of dangerous industrial waste.**

Trédi is a business unit of Séché Environnement. It offers a comprehensive solution to treat dangerous materials by processing hazardous waste by high temperature incineration with heat to energy recovery. The site you will visit is the only site in the world that has expertise in both decontamination of transformers and elimination of PCBs (Polychlorinated biphenyls).

- ☑ **SPEICHIM PROCESSING COMPANY: SME specialized in distillation and solvent purification.**

This SME is a leading reference on the French purification market. It acts as a backup to manufacturers of pharmaceuticals, fine chemicals, cosmetics, perfumes and petro-agrochemicals. Thanks to ad hoc industrial equipment for distillation (atmospheric, vacuum and short path distillation), the company can satisfy the most specific requests of its clients.

### 17h30 Return to Lyon

### 18h00 End of the visit

## Visit 2: Solar and building energy efficiency

### 15h15 **Presentation of Savoie Technolac**

Energy innovative campus and national reference pole in the sector of the renewable energy. It has 9000 employees, 230 innovative companies, 25 research centres and superior educational institutions.

The business Incubator of Savoie Technolac supports over 50 *starts up* in the energy sector, every year. For example, the company Energy Pool (Schneider Electric) is, nowadays, a great actor in the effacement field.

### 15h30 **Visit of the National Institute of Solar Energy (INES)**

The National Institute of Solar Energy is the first French centre and the third in the world in the solar energy field, with over 350 researchers, most of them coming from the Commissariat de l'Energie Atomique (CEA - French Alternative Energies and Atomic Energy Commission).

The INES platform "Recherche et Innovation" (Research and Innovation) aims at developing innovative technologies and products in photovoltaic and thermic sectors. The platform contributes also to integrate these technologies in smart buildings.

### 17h30 **Return to Lyon**

### 19h00 **End of the visit**
